## SUMMARY

Curious and driven undergraduate with freelance experience in web and software development, passionate about solving real-world problems through code and continuously learning across IT, full-stack development and game development.

---

## EXPERIENCE

### Software & Web Developer | Le Nouveau Maquis | Atlanta, GA | June 2023 – Present

- Developed a cross-platform mobile app using React Native for menu browsing, ordering, and reservations.
- Developed and deployed backend services with Node.js and Firebase for real-time data, authentication, and cloud functions.
- Designed and launched a responsive, SEO-optimized website using WordPress with custom HTML, CSS, and PHP.
- Reduced wait times by 40% by implementing a scannable menu page, allowing dine-in customers to view offerings instantly.
- Increased customer engagement by 60% after launching a mobile-friendly website with an easily accessible digital menu.

### IT Assistant | Georgia Gwinnett College | Atlanta, GA | June 2022 – May 2024

- Provided real-time tech support in classrooms, resolving issues quickly to minimize downtime and maintain instructional flow.
- Assisted in setup and maintenance of collaborative learning spaces, improving student engagement and technical reliability.
- Utilized ticketing systems to manage support requests and increasing resolution speed by 30%.
- Monitored classroom tech setups before and after sessions, resolving issues and reducing last-minute disruptions by 40%.

---

## PROJECT

### Walking Trail App | GGC | August 2024 – December 2024

- Developed an interactive trail map using Google Maps API with markers showing educational videos and trail-specific content.
- Implemented user authentication, including Google sign-in and user-specific data management using MongoDB and Mongoose.
- Led database design to support user profiles, content uploads, and admin management features using MongoDB.
- Achieved 100% mobile responsiveness across 10+ pages, ensuring consistent performance on all devices.
- Enabled content management for 3 GGC walking trails, each with mapped paths, location-based videos, and user guidance.

### 3D Portfolio

- Designing and developing an immersive 3D portfolio using React Three Fiber.
- Implementing interactive 3D scene with clickable elements for project navigation.
- Using GSAP to create smooth camera transitions between portfolio sections.
